Professional Summary

Full stack developer with 3+ years of experience building and shipping web applications that are fast, scalable and maintainable. Experienced in engineering complete solutions from frontend to backend using TypeScript, React, and Vue, along with APIs built with C#, ASP.NET and Node.js.

Work Experience

Full Stack Developer Jan 2023 - Present
ClickNext Co., Ltd. Bangkok, Thailand

- Developed and shipped several end-to-end web applications using TypeScript and Vue on the frontend, integrated with C# and ASP.NET on the backend
- Built a scalable frontend architecture with Pinia, Axios, and Vite that simplified state management, data fetching, and development workflows
- Designed and managed Oracle, Microsoft SQL Server and PostgreSQL databases; wrote efficient LINQ queries and handled data concurrency for multiple transactions
- Improved application performance by refactoring code, optimizing slow queries, and implementing server-side caching with Redis
- Built a two-way integration with Microsoft Dynamics 365 Business Central via OData, syncing and posting daily business transactions
- Automated the transformation of raw data into Excel, PDF reports, and wrote DAX queries for Power BI

System Analyst Aug 2021 - Oct 2022
Omni Star Co., Ltd. Hat Yai, Thailand

- Coordinated with a cross-functional team to successfully implement an ERP system that replaced legacy spreadsheets, improving management workflows
- Translated business requirements from senior management into clear technical specifications using UML diagrams, streamlining development for backend engineers
- Migrated, cleaned and validated records from the legacy system without disrupting day-to-day operations
- Acted as primary administrator for sales, purchasing and inventory modules within the ERP system

Frontend Developer (Internship) Jan 2021 - May 2021
Innovative Village Co., Ltd. Chiang Mai, Thailand

- Built and maintained a responsive content management system using React and Bootstrap
- Collaborated with designers to translate Figma designs into reusable UI components
- Wrote efficient, maintainable data-fetching functions to handle integration with backend APIs
- Monitored web traffic and user behaviour using Google Analytics to improve UX across various devices
- Participated in code reviews and refactored existing code, improving render time and reducing bundle size

---

Education

B.Sc. Information Technology Jul 2017 - May 2021
Mae Fah Luang University, Thailand
GPA 3.85 (First Class Honors)

Skills

Languages: English, Thai, Burmese

Programming Languages: C#, TypeScript, Javascript, HTML5, CSS3, PHP, Java
